The 21<sup>st</sup> century is the century of ‘Knowledge Economy’, and each country needs enlightened youth who can contribute to the development of a strong economy with rich socio-cultural environment. Globalization is the inherent part of the Knowledge Economy and internationalization of education is becoming key to success. IEP is aimed to provide an exposure to Indian students to international pedagogical environment in their academic specialization. It enables the students to know about the cross-cultural environment which ultimately may turn into a strong intellectual capability. IEP provides the opportunity to differentiate the individual in the competitive era.

#### WHAT ACTIVITIES STUDENTS DO DURING IEP?

Under this program, students’ study **two subjects** of their pre final year in emerging areas at the foreign university. Students also appear in internal examination, continuous evaluation and external examination conducted by the foreign professors at foreign university. If a student achieves the passing grades in the exams, he/she is given the waiver for appearing in the internal and external examination of GTU for respective subjects. Apart from the above-mentioned subject-learning experience, students also prepare the projects and case studies as decided by the foreign professors. They also visit the companies to enhance their understanding of the work culture of the foreign country in their respective fields. Apart from the academic activities students also get exposure to the socio- cultural environment by visiting popular places of the country.
